

SUMMARY

Motivated computer engineer with a strong background in designing and implementing efficient systems. Demonstrates expertise in backend development, secure authentication, and data management. Dedicated to using technical skills and problem-solving abilities to drive organizational success.

EDUCATION

R. C. PATEL INSTITUTE OF TECHNOLOGY

Bachelor's of Technology in Computer Engineering
June 2025 | Shirpur, IN
Current GPA : 8.14

GOVERNMENT POLYTECHNIC NASHIK

Diploma IN, Information Technology
2019 - 2022 | Nashik, IN
Percentage : 88.88%

ADARSH MADHYAMIK VIDHYALAY

10th Maharashtra State Board
June 2019 | Shirpur, IN
Percentage : 90.80%

KEY SKILLS

- Full Stack Web Development
- Coding and Testing
- Ability to work independently and as part of a team

TECHNICAL SKILLS

Development

- Html/CSS
- JavaScript
- C (Basics)
- Java
- OOPS
- MySql

Frameworks

- Tailwind
- React.js
- Spring
- Spring Boot

INTERNSHIP

R3 SYSTEM | Web Development

Jan 2023 - Feb 2023 | Shirpur

During my internship, I worked extensively with Spring MVC and Hibernate, applying these technologies to design and implement RESTful web services. I focused on efficient data management and optimizing back-end interactions, which deepened my knowledge of Java-based web development and improved my ability to handle database operations effectively.

PROJECTS

Professional Service Provider | Java, Spring, MySql

- Developed a system with Admin, Service Provider, and User modules, where Admin managed both providers and users for efficient operations.
- Implemented Spring features like JPA, Hibernate, POJOs, and ORM for seamless data handling, gaining valuable backend and database experience during my internship.

Ecommerce Website | React, Tailwind

- I developed an e-commerce website using React and Tailwind CSS, where I integrated APIs to dynamically fetch and display data. The project also made use of React-Redux and the Context API for effective state management, ensuring a smooth and responsive user experience.

OrnaVesta | React, Spring Boot, MongoDB

- Built a web application with Event Manager and User modules, allowing Event Managers to create profiles, upload event photos, and interact with followers, while Users can browse galleries, like/favorite photos, and follow/unfollow managers.
- Implemented secure authentication using Spring Security with JWT, utilized MongoDB with MongoTemplate for data management, and integrated React-Redux with local storage for seamless state management.

CERTIFICATES

- Zensar ESDP Program | 2 months
- TCS CodeVita Certificate | Global Rank : 4865
- Python Fundamentals for Beginners | Great Learning
- Google Cloud Computing Foundational Course Completion certificate

Languages : Marathi, Hindi, English

Interest : Singing
